## Professional Summary

---

Highly motivated B.Tech AIML graduate with strong academic performance. Skilled in machine learning, deep learning, with proficiency in Python, model deployment. Demonstrated ability to deliver real-world projects through internships and academic initiatives, showcasing problem-solving and communication strengths. Currently exploring AI interaction and frontend integration to build immersive, industry-ready applications

## Technical Skills

---

- **Languages & Libraries:** Python, Java, SQL, NumPy, Pandas, Scikit-learn, NLTK
- **Machine Learning:** Supervised Learning, Unsupervised Learning, Feature Engineering, Model Evaluation, Regression, Classification, Clustering
- **Deep Learning:** Neural Networks, CNNs, RNNs, LSTM, Transfer Learning, TensorFlow, Kera
- **Data Visualization:** Tableau, Power BI, Matplotlib, Plotly, Seaborn
- **Tools & Frameworks:** Flask, Streamlit, Git, Firebase, MongoDB, MySQL, VS Code

## Projects

---

### CareerAI • Resume-to-Job Recommendation System

Developed an AI-powered system that analyzes resumes and recommends suitable jobs using ML-based matching.

### SpamShield • Email Spam Detection

Built an AI-powered spam and phishing detector using machine learning, URL analysis, and risk scoring dashboard.

### TraderPulse • Market Sentiment Analysis

Conducted trader behavior and market sentiment analysis using historical trading data and Jupyter notebooks.

### SoloLeveling • AI Training System

Created a gamified AI training platform with progression mechanics inspired by Solo Leveling.

### WatchWave • Movie Streaming Interface

Designed a Netflix-inspired streaming platform with authentication, watchlist, and modern UX.

## Experience

---

### Intern-APSCHE-IIDT-Blackbucks

*Jun2024-Jul2024*

Worked on a Generative AI-based Movie Recommendation System. Gained practical experience in AI model development using Python and improved skills through daily tasks.

### Intern – AI-ML Virtual Internship

*Oct2025-Dec2025*

Worked on machine learning and deep learning projects, gaining practical experience in AI model development using Python. Strengthened skills in data preprocessing, model training, and daily tasks and project assignments.

## Education

---

### BTech – Artificial Intelligence & Machine Learning

SRKREngineeringCollege

CGPA:8.7
